## Biography

**Name:** Sheyene Gerardi
**Bio Received Date:** 09/08/2020

Sheyene Gerardi is a Venezuelan Actress and Media Executive. She is the Lead of Robotics Outreach at NASA (CLASS) and co-founded the NASA´s Planetary Landing Team in 2018. Gerardi founded and operates the Sheyene Institute, a company that works on technologies to mining resources on the Moon, Mars and asteroids, the Sheyene Gerardi Network, a variety of mainstream entertainment forms, dedicated to Spurring Participation in Aerospace Competitiveness and Entrepreneurship (S P A C E) and The Sheyene Gerardi Foundation to address concerns that the exponential expansion of space industry will create deep economic and political disparity in the coming century.

Sheyene is member of the International Political Science Association (IPSA), the American Political Science Association (APSA), member of L'association française de science politique (AFSP) and to the committee on professional ethics, rights, and freedoms. Sheyene is also member of the American Society of International Law; and member of the Women's International League for Peace and Freedom.

Gerardi's interests include the interaction of domestic and international politics, globalization, foreign aid, and international trade policy. Her current research focuses on two-level games, international relations between developed and developing countries, the diffusion of the Internet, the politics of foreign aid and the impact on policy. The object of this research is to explore the logic and morality of politics from the joint perspectives of (a) underlying principles and (b) derivative public policies. The broad issues to which it attends include such questions as Technological Globalization, Space Law, Human Rights, International Security, Sovereignty, Federalism, War, Peace, Terrorism, and so forth.

Sheyene is currently working along with governments and international partners to introduce robotics education into low-resource communities or conflict areas, such as rural schools, refugee camps, non-formal school systems and prison systems in concert with entertainment productions for social change to educate the public and guide them to take action.

On April 2020, Sheyene enrolled in the University of Naples Federico II to acquire a degree in Political science and she is attending a Monte Carlo simulation program offered by Stanford University.
